

Iowa Age to Purchase Mobile App

What is it?

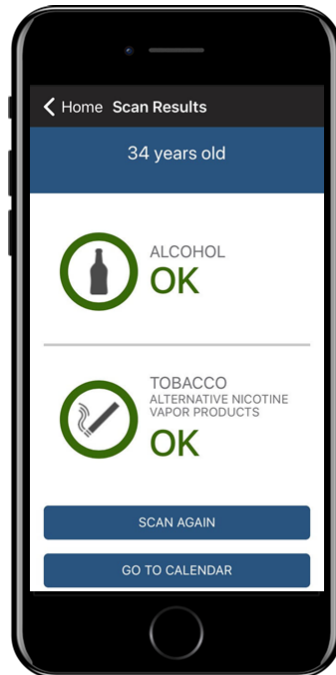

The Iowa Age to Purchase App allows users to scan driver's licenses with their smartphone. No personal information of the customer is stored on the device. The built-in scanning function uses the camera feature on the device to scan the barcode on the driver's license to quickly help determine age and validity. The app also gives users access to a view similar to the desktop calendars previously issued by the division and a manual DOB calculator.

This app is strictly a supplemental tool and is not a replacement for any reasonable and necessary steps or factual evidence that may be needed to determine the age of a person.

Who should use it?

Anyone that is looking for assistance in determining the age of customers while selling or serving alcohol, tobacco, alternative nicotine, or vapor products should use this app.

Additional Features

The app also contains links to two online training programs, I-PACT and I-LEDGE, which help teach responsible selling and serving of alcohol, tobacco, alternative nicotine, and vapor products.

The Iowa Age to Purchase App is available to download for free from the App Store and Google Play Store.
