Chairman,	County Soil and Water Conservation District		
	n inspected and certified as having adequate ground cover consisting nary and secondary noxious weeds present are being controlled to ner wind or water.		
Signed:	Date:		
Chairman,	County Board of Supervisors		

#### Natural Conservation or Wildlife Areas Property Tax Exemption Instructions, page 3

The exemption may be applied to recreational lakes, forest covers, rivers and stream banks, and open prairies as designated by the board of supervisors of the county in which the property is located.

This exemption is only available to parcels of property of two acres or more. The property must also be utilized for the purposes of providing soil erosion control, wildlife habitat, or both.

An exemption is allowed for rivers and streams or river and stream banks only if the land is located at least 33 feet from the ordinary high water mark of the rivers and streams or river and stream banks.

If the property is an open prairie, the property will be inspected and certified as having adequate ground cover consisting of native species, and that all primary and secondary noxious weeds present are being controlled to prevent the spread of seeds by either wind or water.

If the real property is located within a city, the approval of the governing body must be obtained before the real property is eligible for an exemption.

A property receiving this exemption shall not be used for economic gain of any kind during the assessment year. This includes, but is not limited to, the storage of equipment, machinery, or crops.

If the property is used for economic gain during an assessment year in which it has received this exemption, the property shall lose its exemption and be taxed at the rate levied by the county for the fiscal year beginning in that assessment year.
