Beginning in tax year 2022, taxpayers who wish to claim the Farm to Food Donation Tax Credit under Iowa Code chapter 190B must use the IA 178 Farm to Food Tax Credit Form to report eligible donations of food commodities and to calculate the Farm to Food Donation Tax Credit for the tax year. For tax year 2022 and later, donor-producers are not required to receive a tax credit certificate from the Iowa Department of Revenue (Department) prior to claiming the Farm to Food Donation Tax Credit.

General instructions - Complete all applicable fields. Failure to provide the information necessary to verify the credit claimed will result in the denial of the claim. If more space is needed, include additional sheets. In order to complete this form, you will need the authorized receipts you received from authorized food organizations for donations made during tax year 2022. Each donation must be separately reported. If a single donation included multiple food commodities, list each commodity on a separate line. This form must be included with your tax return.

If the donor-producer is a pass-through entity (partnership, LLC, S corporation, estate, or trust), the tax credit is allocated to the members in the ratio of each member's share of the earnings of the entity to the entity's total earnings. Special allocations are not permitted. Report the tax credit to the Department and to members as instructed below (see Where to Report This Tax Credit).

Part II — Iowa Farm to Food Tax Credit calculation

Column A: Food organization code - Enter the six-digit food organization code for each entry. The Iowa Department of Revenue assigns a unique organization code when the food organization registers with the Department. The food organization code can be found on the authorized receipt provided by the food organization when the donation was made.

Column B: Receipt number - Enter the number listed on the receipt provided when the donation was made.

Column C: Donation date - Enter the month, date, and year that the donation was made.

Column D: Donated commodity - Indicate the commodity type of dairy, eggs, meat, produce, or other.

Column E: Donation quantity - Enter the quantity or amount of the commodity donated. If the donation included a fractional amount, round to the nearest whole unit. For example, if a donor-producer donated pumpkins weighing a total of 142 pounds, 7 ounces, "142" should be entered in Column E. If the donated pumpkins weighed 142 pounds, 8 ounces, "143" should be entered in Column E.

Column F: Indicate the measurement unit applicable for the donated commodity. Use the measurement units of pounds, gallons, or quantity. Report egg donations by the total number of eggs donated, not by the dozen or the gross. Report donations of meat and fresh produce by weight using pounds. Report donations of dairy products using gallons, if the donated product was a liquid, or using pounds, if the donated product was a solid.

Column G: Price per unit - Enter the price assigned to the commodity on a per unit basis. Use the price of the commodity on the date the donation was made to the authorized food organization.

Column H: Total donation value - Enter the total donation value. Multiply the quantity listed in Column E of the corresponding line by the price per unit listed in Column G of the corresponding line.

Column I: Credit calculation - Enter the Farm to Food Donation Tax Credit available for each donated commodity. Multiply the amount in Column H of the corresponding line by 15% (0.15)

Part II Total

Line 1: Sum the amounts listed in Column I. Enter that sum or \$5,000, whichever is less, on line 1. See Where to Report This Tax Credit below.
