

You may owe less tax by completing the worksheet below. All filing statuses except filing status 1, Single, may qualify for the alternate tax computation. Single taxpayers may be eligible for the Iowa income tax reduction; see Iowa Income Tax Reduction Worksheet.

If you are using alternate tax calculation on IA 1040 in lieu of the tax rate calculation, check the box in IA 1040, Step 5.

Special instructions for filing status 3, Married Filing Separately:

- The combined Iowa taxable incomes of both spouses must be used.
- The alternate tax between spouses must be prorated in the ratio of the Iowa taxable income of each spouse to the combined Iowa taxable income of both spouses using lines 7-11.
- If you are married filing separately and one spouse has a Net Operating Loss (NOL) that will be carried forward, then you cannot use the alternate tax computation. If the spouse with the NOL elects not to carry the NOL forward, then you can use the alternate tax computation. A statement must be included with the return saying that the spouse with the NOL will not carry it forward.
- If you are using filing status 3 and do not provide the other spouse's income on the IA 1040, Step 2, you will not be allowed the alternate tax calculation.

	B. Spouse	A. You or Joint
