

Fuel Tax Monthly Report for June 2026

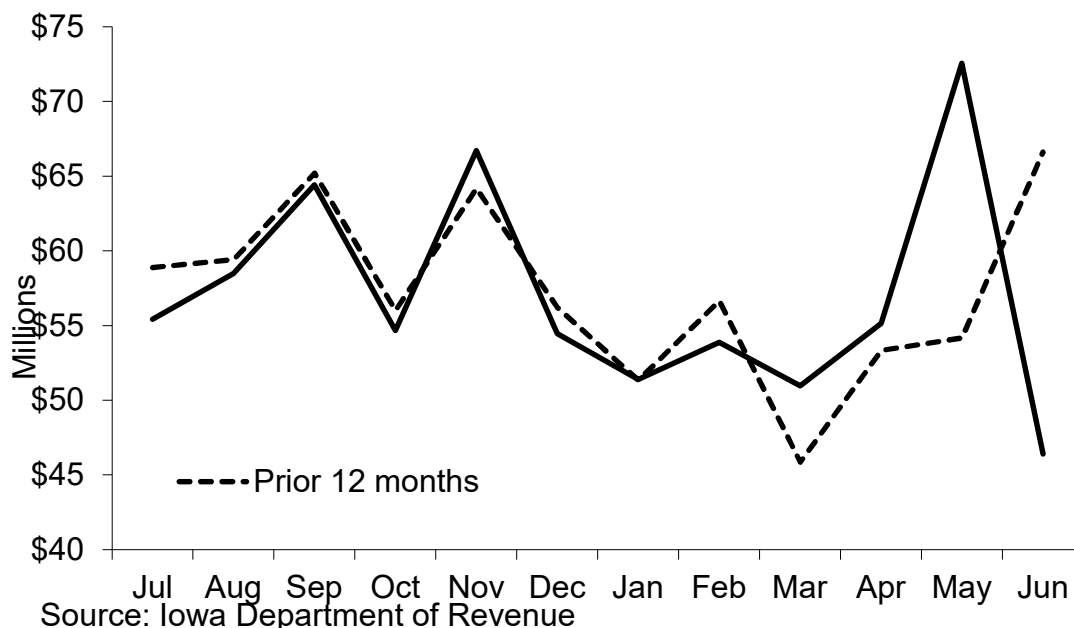

The Iowa Fuel Tax Monthly Report presents the gross gallons of fuel delivered by Iowa licensed Suppliers, Blenders, Importers, Restrictive Suppliers, and Liquefied Petroleum Gas/Compressed Natural Gas Dealers and Users. The report is published on the Motor Fuel monthly reports page of the [Iowa Department of Revenue website](#). Each month's report is available no later than the last working day of the month following the tax reporting period it covers.

Please note, due to recent changes to the reporting process and timeline of the Fuel Tax Monthly Report, the June 2026 report includes information from returns filed at the end of June 2026. The July 2026 report includes information from returns filed during the month of July 2026. Moving forward, Fuel Tax Monthly Reports will be prepared using motor fuel tax information gathered during the calendar month of the report.

Page 3 of the report shows monthly collections for ten fuel types and collections from prior tax periods reported as accounts receivable. Fiscal Year-To-Date and Prior Fiscal Year-To-Date collections, refunds, credits, and collections less refunds and credits are also provided. While refund claims can be filed throughout the year, credits are claimed once annually on income tax returns.

Figure 1 compares monthly net collections across the last 24 months. In June 2026, collections were \$46.4 million, 30.3 percent lower than June of last year. Year-over-year motor fuel net collections decreased by 30.2 percent and collections on diesel decreased by 30.8 percent. Monthly collections were higher than prior year numbers in 5 of the last twelve months. Because the number of taxable gallons may be reported in a month other than that for which taxes are remitted, net collections do not necessarily reflect the number of taxable gallons sold in the month. In June 2026, taxable gallons of motor fuel were 37.6 percent lower than in the previous June; taxable gallons of diesel were 23.1 percent lower than in the prior June.

**Figure 1. Iowa Monthly Fuel Tax Collections Less Refunds and Credits:
Most Recent 12 Months Compared to Prior 12 Months for June 2026**

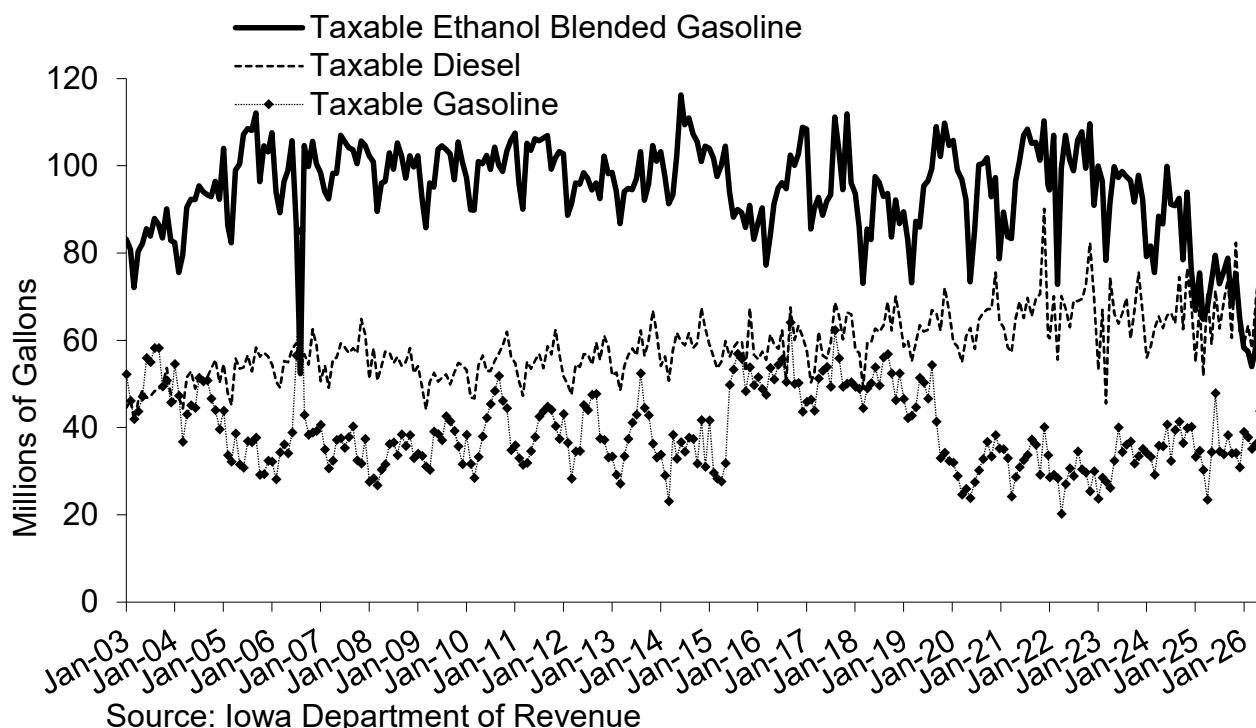

Collections and gallon amounts contained in this report are from the Supplier/Terminal or “Rack” level, not the retail level. Further blending of products may occur along the fuel distribution chain. This is the case for most E15 or Higher (gasoline blended with 15 percent of ethanol or higher percentages) gallons, so the gallons reported for this fuel type are far below the number of retail gallons sold in Iowa.

Page 4 of the report shows gross gallons and taxable gallons by fuel type. Exported gallons account for most of the difference between gross and taxable amounts since Iowa exports well over half of the ethanol blended gasoline produced in the state.

Between 2005 and early 2015, ethanol blended gasoline accounted for a monthly average of 73 percent of taxable gallons of motor fuel (see Figure 2). For the period since June 2015, the monthly average percentage of taxable gallons reported as ethanol blended gasoline is 69.9 percent, reflecting a change in the manner in which the types of taxable gallons are reported by suppliers. Comparisons of ethanol blended gasoline’s share of total taxable gallons over time should be made with attention to this limitation. In June 2026, gallons of ethanol blended gasoline represented 60.6 percent of motor fuel taxable gallons.

Figure 2. Iowa Monthly Taxable Ethanol Blended Gasoline, Gasoline, and Diesel Gallons: January 2003 – June 2026

The report also shows a breakdown of the refund dollar amounts by claim type for the month. Refunds are claimed against taxes paid on fuel that is used for non-taxable purposes, such as agricultural or commercial non-highway uses. Refunds are also claimed for excess tax on blended fuel and denaturing alcohol. The excess tax on blended fuel refund results when a blender purchases gasoline taxed at 30.0 cents per gallon and collects tax on the resulting ethanol blended gasoline at 26.5 cents per gallon. Therefore, the additional 3.5 cents paid on the gasoline is eligible for refund; similarly for the 3.0 cent gap between taxes on diesel and B20 or higher blends. The denaturing alcohol refund applies when the denaturant (gasoline) taxed at 30.0 cents per gallon is blended with food grade alcohol to produce ethanol blended gasoline E15 or Higher. When a refund of Iowa fuel tax is granted for non-taxable usage, those gallons become subject to Iowa sales tax, unless a sales tax exemption applies. Sales tax collected on those gallons is included at the bottom of the final page of the monthly report.

GALLONS USED IN A MANNER EXEMPT FROM FUEL TAX

Sales Tax \$13,390

Please note that for tax periods after 7/1/2024, gallons of B11 to B19 are taxed as undyed special fuel and gallons of B20 or Higher are taxed at a reduced rate.
